-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Supplemental  
DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 3, line 1, "the device" lacks a prior antecedent.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 5, 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leung (United States Patent Publication No. 2003/0052115) in view of Nakagawa et al. (United States Patent Publication No. 2002/0189128) and Lo (US 2003/0071027).

Leung discloses a hair styling device that heats hair by conduction of heat from a heated surface (see para 0028) and includes a fan and a motor. The device further

comprises a handle portion 100, a barrel portion 300 adjoining the handle portion, a heater 216 contained in the barrel portion, a flipper 303 mechanically linked to a flipper actuator, air inlets in the housing, an air guide 119 for directing air into the barrel; and outlet holes 307 formed in the barrel. Leung does not disclose the ion generator or the device being a flat straightner. Nakagawa et al. disclose a hair styling appliance having an ion generator system 62. The ion generator system comprises an anode pin and a cathode ring. The device further includes an indicator LED 9 for the ion generator. It would have been obvious to one skilled in the art to provide the curling iron of Leung with an ion generator system in view of Nakagawa et al. in order to treat the hair and make it smooth and silky. Lo teaches a curling iron and a straightner (see Figures 4-7). It would be obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Leung by having the device be a flat straightner as shown in Lo, in order to allow the user multiple functions to straightner the user's hair.
